BridgeValley Launches New Mobile Safety Platform, CrisisManager

South Charleston, W.Va. – BridgeValley Community and Technical College recently introduced students to a new mobile safety platform called CrisisManager. This mobile application provides students with step-by-step instructions for specific emergency response plans.

CrisisManager allows BridgeValley to update response procedures in real-time, including building diagrams, campus maps, and emergency phone numbers. Individuals at BridgeValley can utilize CrisisManager's one-tap emergency contact calling and incident reporting feature. The college's safety plans are available with or without a Wi-Fi connection, are fully customizable, and password-protected.

CrisisManager also provides support for more common emergency scenarios such as inclement weather, power outages, small fires, and other incidents. For more information, please visit www.schooldude.com/crisismanager.

BridgeValley Community and Technical College was founded on March 20, 2014 and serves a six-county region including Fayette, Raleigh, Nicholas, Clay, Putnam and Kanawha counties. The college operates two campuses in Montgomery and South Charleston, along with the addition of the new Advanced Technology Center. BridgeValley awards one-year certificates and two-year associate degrees in many fields including civil, mechanical and electrical engineering technology, business and health management, nursing, dental hygiene, business technology, medical assisting, diesel technology, computer information technology, and welding.
