The information contained within this area of the Transfer Equivalency Catalog is specific to the institution from which the credit is transferred. You will find the school's federal code and address in the left portion of the block. The right portion of the block contains information regarding the highest level of undergraduate credentials the school offers and whether the credit earned was based on a semester or quarter hour system.

In the following pages, you will learn how to interpret four common scenarios you may encounter within the Transfer Equivalency Catalog.

This block indicates how the home institution records the credit. This course is being recorded as "ENG 1101 English Composition I". Because both the awarding institution and BridgeValley operate on a semester schedule and because the English course is not a variable credit hour course, the Low and High credit values remain 3 before and after the equivalency conversion.

This block shows how the credit is accepted at BridgeValley. Since we offer an equivalent English course, we utilize our subject code and course number. However, we retain the home institution's subject code and course number within parenthesis so as to avoid any complications that may arise from accidental duplication of credit. The credit column indicates the appropriate number of credit hours as determined through the equivalency conversion. No conversion is necessary unless the home institution operates on a quarter hour system.

As with the previous example, this block indicates how the home institution records the credit. This course is being recorded as "PSC 1104 Physical Sci I & Lab". Because the lab is integrated into the course, this course is valued at 4-credit-hours. Again, because this course is not a variable credit hour course, the Low and High credit values remain the same before and after the equivalency conversion. However, you'll notice something a little different about how the converted hours translate into an equivalency at BridgeValley.

EQU GRP	SUBJ COURSE	TITLE	EFF TERM	BLTN YEAR	TRANSFER		CONVERTED		MIN GRD	STATUS

The equivalency in this block differs from the English course in the previous example because BridgeValley breaks Physical Science I and its coinciding lab into two separate units. Therefore, the course component is recorded as 3-credit-hours and the lab component is recorded as 1-credit-hour. Again, we utilize our equivalent subject code and course number just as we did with the English course. The original course information is preserved in parenthesis.

I know what you're thinking. Did this student really take a course in Mind Reading?

As you know, we do not offer such a course at BridgeValley. However, we do offer a variety of courses in psychology.

In the event we do not offer an equivalent course but do offer other courses within the same subject area, we will utilize our subject code and a modified version of the home institution's course number. In this instance the 2X8 indicates 200-level work within the subject area of psychology.

At this point, you may be asking yourself what happens to courses for which BridgeValley does not offer an equivalent subject. We don't just throw those courses to the lions. Instead, these courses are available to be used as electives.
