

BridgeValley

SUCCESS STORIES

I chose to attend BridgeValley right out of high school because it was a small school and when I visited with my high school it felt like it was a good fit.

There have been so many instructors who have motivated me along the way, particularly Ashley Lewis and Carla Blankenbuehler. I've had Professor Lewis for a few classes and she has been there for me and checked on me while I pushed through any obstacles I faced. She always has a smile on her face, kind words and excellent advice to give.

I'm currently the president of BridgeValley's Phi Theta Kappa chapter and Carla Blankenbuehler has been the faculty advisor since my second semester. She has become more than just an advisor; she is a friend and like a second mother to me.

The people I have met and experiences I've had are what make BridgeValley memorable. I've been able to take all of my tests and receive counseling services at the Student Success Center, which has been an important part of my success on campus.

BridgeValley has brought me experiences and friendships I would have never received without enrolling.

After graduation, I plan on becoming a registered nurse and ultimately working in the VA system and/or at Walter Reed Medical Center.
